

TURNING EXPERIENCE INTO PRACTICE

MEMBERSHIP APPLICATION

NOTE: TMC membership is only available to individuals from fleet/motor carrier companies, suppliers of products and services to the motor carrier industry, professional technicians, owner/operators and educators. If you are unsure what category you fall under, please call 703-838-1763 or email tmc@trucking.org for clarification. Most categories of membership require an executive or corporate member be in place before additional members may join. Submitted applications are subject to audit and you will be contacted if corrections are required.

Check the Appropriate Box Below

- Full Fleet Membership** – open to individuals responsible for selecting and/or maintaining commercial motor vehicles and components for motor vehicles.
- Associate Membership** – open to individuals responsible for the design, manufacture or sale of a product or service to the trucking industry.
- Service Provider Membership** – open to individuals affiliated with any truck or trailer repair shop engaged in the maintenance of commercial motor vehicles.
- Trade Press** – open to individuals working as editorial press or sales associates for a publication providing coverage of news events to the trucking industry.
- Educator Membership** – open to instructors at transportation educational facilities.
- Owner-Operator/Small Fleet** – open to individuals who own and maintain 100 or fewer commercial motor vehicles.
- Technician Membership** – open to individuals who work as professional service technicians employed by companies in the commercial vehicle industry.

WHO IS TMC AND WHAT DOES IT DO?

The Technology & Maintenance Council is a diverse group of industry professionals who work together to improve truck equipment and technology. TMC develops industry-recognized recommended practices used by fleet managers to efficiently specify and maintain vehicles.

TMC began in 1956 when a small group of maintenance directors sat down with representatives from the truck manufacturing community to discuss recurring equipment maintenance problems. Since then, TMC has grown into an organization of more than 2,500 members with representatives from virtually every sector of the industry: fleets, owner/operators, manufacturers, suppliers, service providers, educators, press, association representatives and technicians.

WHAT BENEFITS DO YOU ENJOY AS A MEMBER?

- TMC's two-volume *Recommended Maintenance & Engineering Practices Manual* with supplements. Available online exclusively for all TMC members (more than 500 individual RPs with illustrations) offers maintenance and specification best practices developed jointly by the industry's top maintenance and engineering professionals.
- An annual subscription to *Transport Topics*, a weekly newspaper that focuses on current industry issues. (Not provided for Owner/Operator, Small Fleet or Technician members.)
- Member price for NATMI's (North American Transportation Management Institute) Certified Director/Supervisor of Maintenance courses.
- Monthly council newsletter – *Fleet Advisor* for maintenance managers.
- *Fleet Maintenance & Technology*, TMC's quarterly technical magazine offering coverage of council news and featuring in-depth articles on topics important to trucking professionals.
- TMC's Membership Directory is available on-line and mailed annually to all TMC members.
- *The Trailblazer*, TMC's technical journal reports all meeting proceedings.
- Substantial discounts on registration and exhibit booth fees for all TMC annual events and up to 25 percent discounts on TMC products and publications, such as the best-seller *Radial Tire Conditions Analysis Guide*.
- **TMC/FleetNet America Vertical Benchmarking Program**, a roadside breakdown benchmarking service enables companies to compare their fleets' unscheduled roadside repairs with those of similar fleets. By tracking what systems are failing and comparing that to similar fleets, the study assists trucking companies in understanding the effectiveness of their overall maintenance operations.
- **ATA's Fleet CyWatch** program assists motor carriers in their operations by identifying emerging cyber threats and helps guard against malicious actions of cyber criminals. By coordinating with private and Federal law enforcement, the program provides fleet members with information and recommendations in the areas of cybersecurity awareness, prevention and mitigation methods. For details, visit fleetcywatch.trucking.org.
- ATA and TMC have partnered with PIT Group for field testing and truck engineering projects. TMC members will have access to PIT's expert engineering services at a discounted rate.

WHAT DO INDUSTRY EXPERTS HAVE TO SAY ABOUT TMC?

"I've received a plethora of information from TMC that I've used to implement changes and control costs in my company. Most of the new processes and procedures relate to the RP manuals," said Mike Jeffress, vice president of maintenance with Maverick Transportation, based in Little Rock, Ark. "The changes have improved our overall environment and operation."
